

UK Military

- STASS being used by aircrew
- Introduction of P-STASS (passenger version)
 - Project started about 6 years ago
 - Has been stalled because source of compressed air falls within UK HSE diving regulations: require annual diving medical: not feasible
- Training prevented by:
 - Lung disease
 - Acute current chest infection
 - Asthma (10% of population)
- Sources: Surg Cdr Wylie PMO HMS Yeovilton, Surg Cdr Baker Consultant Advisor to RN in Aviation Medicine
