

E452 SURVIVAL SUIT

NAUTILUS™ BY PROTEXION E452

➔ Nautilus™ by Protexion survival gear has made its mark meeting high performance standards in extreme settings.

Since the evolution of the E352 to the new Nautilus™ by Protexion E452 suit system the one-piece design is now equipped with an integrated lifejacket polyurethan boots, light and removable liner. The suit offers an optional breathing system and personal locator beacon. Every component of the suit, from the fabric and the zippers right down to the individual threads has met the most rigorous test criteria. The suit is also dual-approved, ready to climb aboard a lifeboat or take off in a helicopter.

What also sets the new E452 apart in Canada is our ability to deliver 100% service support. With two Service Centers in Canada (NS & NF), we've built many long lasting strong relationships. Through our experience and the expertise of our personnel no other manufacturer can offer the same Canadian coverage and immediate servicing of their suits.

➔ FEATURES

- Lightweight removable insulating liner provides more efficient maintenance.
- Neoprene wrist cuff and 3 finger glove provides greater comfort and improved performance.
- Over cuff keeps water from draining into work gloves.
- Neoprene face seal improved for greater performance.
- Integral Hood redesigned for improved comfort, fit and suit performance.
- Polyurethane insulated boot flexible and warm below -30° C and on average 40% lighter than equal insulation rubber or PVC boots.
- Integrated CO² inflated lifejacket saves time and confusion in routine or emergency operations.
- Removable accessory attachments for personal locator beacon and emergency breathing systems.
- Reflector tape approved SOLAS reflective tape for increased visibility.

➔ APPROVALS

- [CAN/CGSB 65.17-1999](#) - Helicopter Passenger Transportation Suit Systems
- [CAN/CGSB 65.16-2005](#) Marine Immersion Suit Standard.
